

CISSC

**Center for International Scientific Studies &
Collaboration**

**Ministry of Science, Research and Technology
Islamic Republic of Iran**

ICRP

Invited Collaboration Research Program

- Collaboration between Iranian Researchers and Foreign Ones
- Prominent international researchers are invited for a specific period of time in order to engage in collaborative research projects with Iranian scholars
- Facilitating international scientific collaboration between researchers
- Publication of joint articles in prestigious journals

ICARD

International Cooperation in Applied Research & Development

- Collaboration between Iranian Researchers all over the world
- Facilitating international scientific collaboration between Iranian researchers
- Iranian Researchers outside the country are the target of this program
- provide opportunities for sabbatical leaves for faculty members who want to immerse themselves in a foreign community and gain experience in international research collaborations

SESAME

Synchrotron-light for Experimental Science and Applications in the Middle East

- Officially joined SESAME project in 2007
- A joint research project based in Jordan
- building a synchrotron machine (giant machine for generation of X-rays with adjustable frequency) for use in scientific applications.
- A part of advanced engineering sciences for particle physics, with huge opportunities in medicine, environment, agriculture, etc.
- Permanent members are Islamic Republic of Iran, Jordan, United Arab Emirate, Bahrain, Pakistan, Turkey, Palestine and Egypt

Workshops & Conferences

- CISSC provides financial and logistic support for academic conferences, meeting and workshops
- Organizes annual International conference which brings together distinguished professors and scholars with wide- ranging expertise
- Hosts regular speeches
- CISSC sponsors short courses, summer or winter schools, conferences,
- Priority is given to topics of national and International importance such as Sustainable Development, Dust Storm, Water Resource Management...

Simorgh

- Started in 2010
- Provides opportunities for the faculty members and students at Iranian universities to enhance their research and training by establishing ties with foreign scholars,
- Designed to attract overseas outstanding scientists and experts in various fields to deliver scientific speech,
- Invited guest/key speakers are required to deliver lectures in one or more universities outside Tehran, preferably in the less developed cities across the country,
- Travel expenses, local accommodation and meals are covered by CISSC.

Pietro Della Valle

- Began in September, 2015
- A memorandum of understanding between the Iranian Ministry of Science, Research and Technology and the Italian Ministry of Education, Universities and Research on
- Funded by the two participating countries.
- A two-year long projects,
- A joint paper will be published.

Gundishapour

- Began in 2005
- Designed to promote collaborations among Iranian and French researchers
- CISSC in partnership with SCAC ‘Cooperation and Cultural Activities, section of the French Embassy
- 120 projects have been supported for a total of 1.523 million Tomans equivalent to \$ 440,000.

Procedure

- **Submission** of joint projects proposals simultaneously in Iran by CISSC and in France by the Campos-France Institute,
- **Approval** of research projects in both countries,
- The **final assessment** by a joint committee of the two countries.
- Reimbursement of **the cost of travel** to France by CISSC and the cost of travel to Iran by the Campos France.

The Projects which

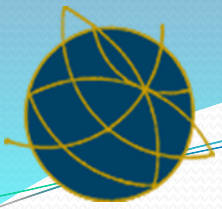

- aim at training at **doctoral or post-doctoral** levels candidates
- promote **collaborations** between Iranian and French laboratories or research centers,
- foster technological **innovation** and competitiveness concentrating on social & economic problems,

Visit to France

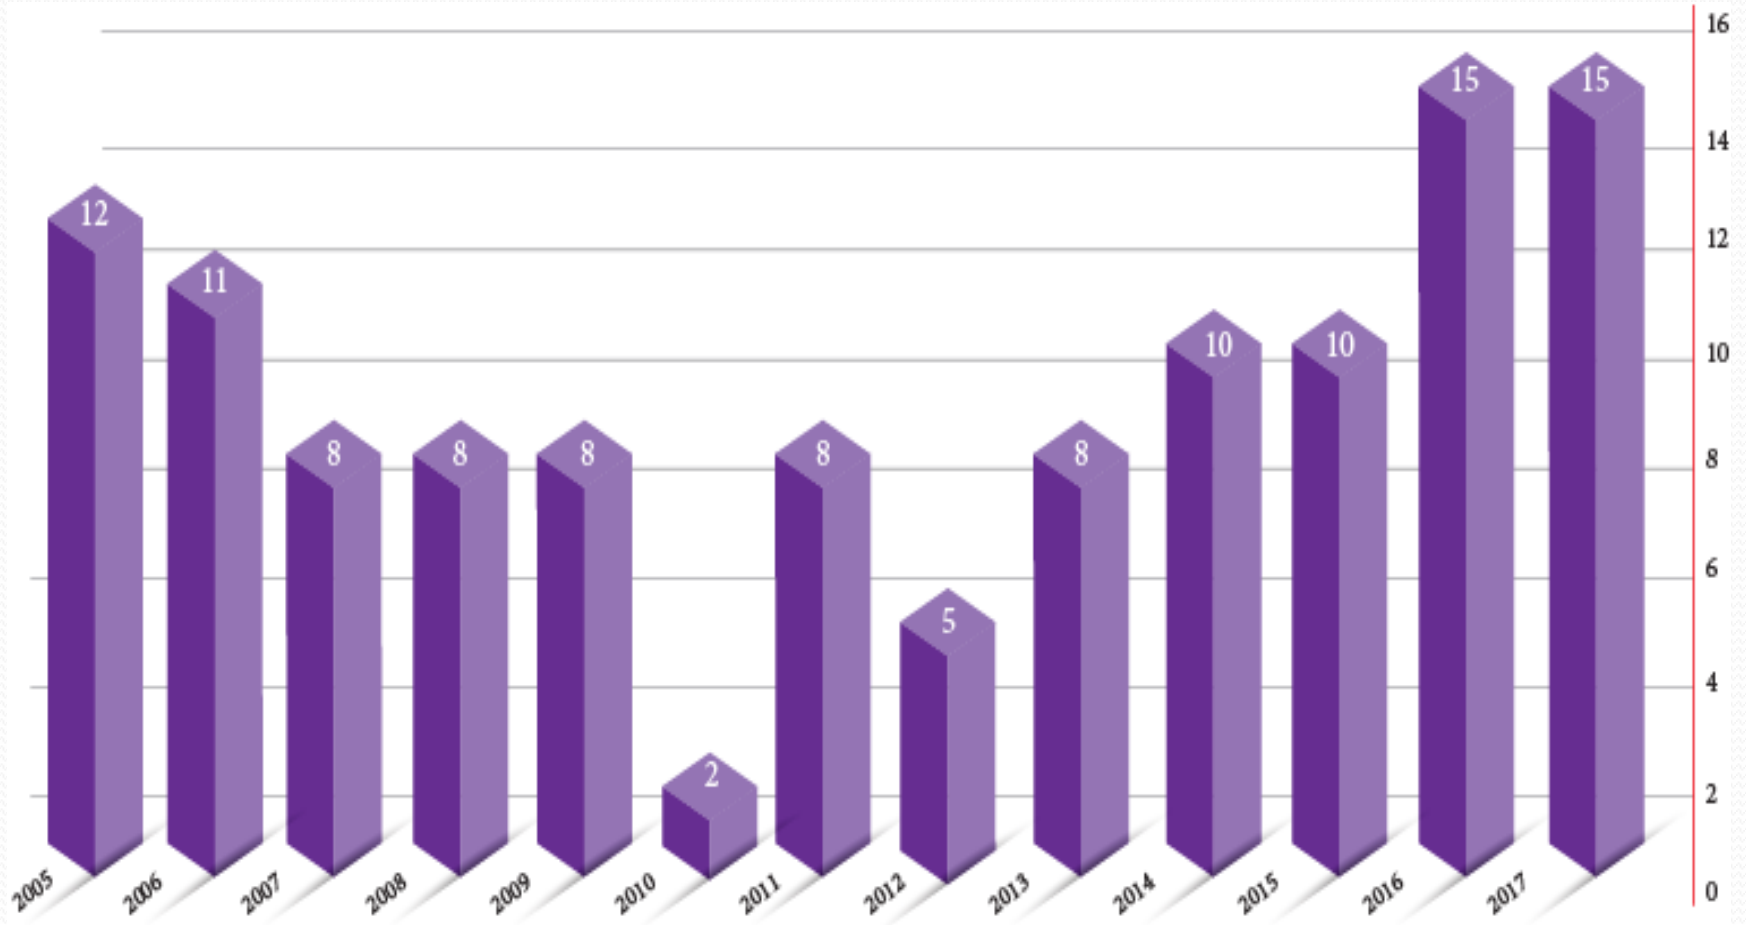

- at a Ministerial Rank
- 19-20 June 2018 (29 20 خرداد 97)
- In all the official meetings Gunidishapur was the talk of the town

Visit to France

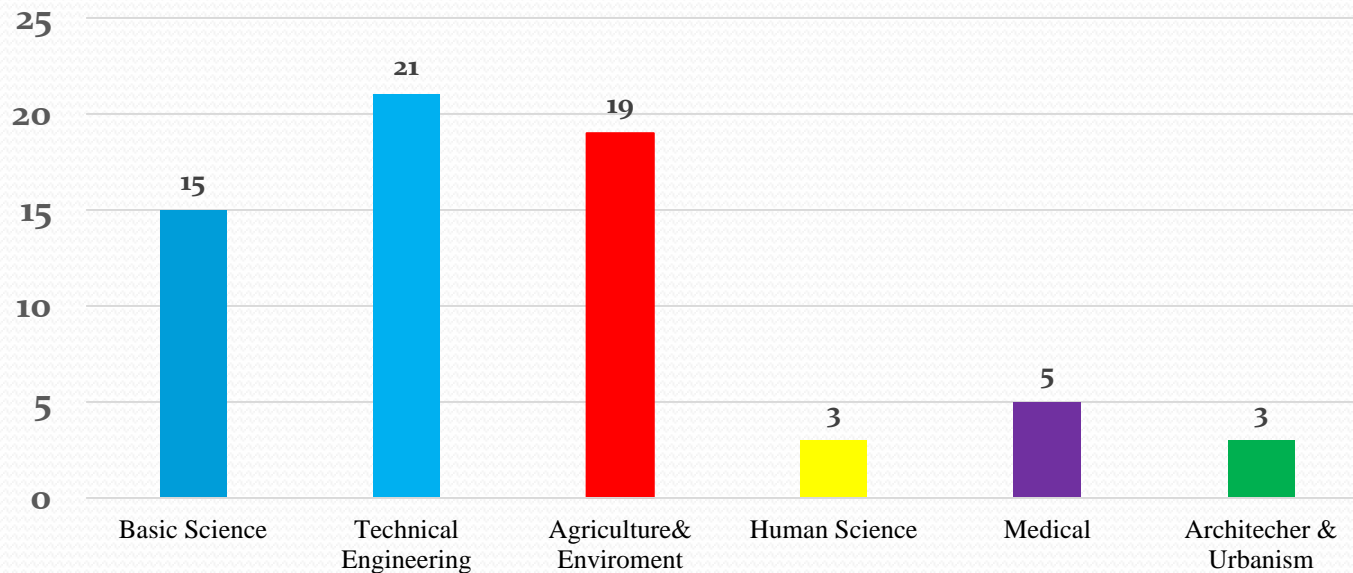

Number of Gundishapour Research Projects :2005-2017

2018-2019

- In 2018, 66 research projects are submitted for the Gundishapour program.

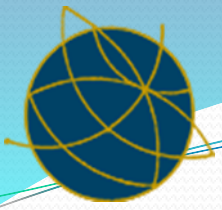

Reserch Projects in the Specialized Domain

- 
- The selection of the projects will soon done in a joint meeting
 - Hopefully the number of the projects is expected to be increased by 20 this year.

Gundishapour Project collaboration with French Universities
