How to Scan your Passport?

One of the most important parts of registering a visa application is uploading a scan of the first page of your passport. The following information can help you to prepare an acceptable scan. Although the acceptance of the scan of the first page of your passport is the responsibility of the mission of the Islamic Republic of Iran that you choose to obtain a visa, the system will refuse to accept scans that do not meet the following requirements.

- To prepare the scan of the first page of your passport according to the required standards, it is recommended to use one of the professional photo editing software.
- The scan of the first page of your passport must:
 - o Be in color. Black and white and monochrome photos may be rejected.
 - Be in jpg or jpeg format
 - Have a size equal to or less than 100 KB
 - Contain only the first page
 - o Be horizontal in such a way that the width of the image is greater than its height.
 - o Have a resolution of 800 (minimum width) by 600 (minimum height) pixels.

- Be of high quality.
- Be neither too dark nor too light.
- Be horizontal so that it is parallel to the edges of the screen.
- All text on it is clearly visible. Any smudges that distort the text may cause the application to be rejected.
